SUMMARY OF CAPITAL GRANTS AND PROJECT DESCRIPTIONS FOR GOVERNMENT AND NON GOVERNMENT SCHOOLS	11

INTRODUCTION

The *States Grants (Primary and Secondary Education Assistance) Act 2000* provides the legislative basis for schools assistance programmes, administered by the Department of Education, Science and Training in respect of the calendar years (2001-2004). This Act specifies the funds to be provided and the associated conditions set by the Commonwealth for government schools, non-government schools and other eligible groups.

The 2000 Act received Royal Assent on 19 December 2000 and provided initial allocations for 2001 through to 2004. Statutory Rule No. 233 of 2002, *States Grants (Primary and Secondary Education Assistance) Amendment Regulations 2002 (No. 1)*, supplemented allocations in the Act for price increases during 2001 and 2002.

Section 116 of the Act requires the Minister to cause a report with respect to the financial assistance granted and other payments authorised under the Act to be laid before each House of Parliament as soon as practicable after 30 June. This report provides a detailed breakdown of expenditure in 2002 from funds appropriated by the Act and a brief description of how funding was allocated in line with the objectives for Australian Government programmes for schools.

Funding is provided by the Australian Government as part of its contribution to the national effort for Australian schooling and, taken as a whole, the programmes represent an integrated approach by the Government to the funding of primary and secondary education.

Not all amounts in this report have been the subject of certified statements at this time. Amounts shown exclude GST.

Due to timing, some figures in this report may differ in later financial reports issued by the Department. Figures in this report may not add to totals due to rounding or truncating.

New Programmes:

The new quadrennium (2001-2004) saw the introduction of programmes of targeted assistance for improving learning outcomes for educationally disadvantaged students, including;

- Strategic Assistance for improving student outcomes programme;
- National literacy and numeracy strategies and projects programme;
- Special Education – Non-government centre support programme;
- Country Areas programme;
- ESL new arrivals programme.

In addition to the General Recurrent Grants programme, funding for eligible schools is now available under the Establishment Grants Programme and for Distance Education Students.

A description of these programmes is provided in the respective sections of the report.

FORMS OF FINANCIAL ASSISTANCE

CAPITAL GRANTS PROGRAMME

The objectives of Australian Government capital funding are to provide and improve school capital infrastructure, with particular emphasis on assisting schools serving educationally disadvantaged students.

In 2002 the Australian Government provided funding of \$323 969 000 of which \$232 548 000 was provided for capital projects in government schools, and \$91 421 000 for capital projects in non-government schools. Funding is provided under Sections 54 and 73 of the Act.

Funds allocated for government schools were distributed as block grants to government school systems in the States and Territories against agreed schedules of capital projects. Funding was allocated on the basis of each State's/Territory's share of government school enrolments. Details of capital grants for 2002 for government schools are provided in the section 'Summary of Capital Grants and Project Descriptions for Government and Non Government Schools'.

Funds available for non-government schools and paid through 14 Block Grant Authorities (BGAs) were determined on the basis of the relative enrolments and general recurrent funding of their participating schools. Project funds were fully committed and are being paid as projects progress. Details of capital grants for 2002 for non government schools are provided in the section 'Summary of Capital Grants and Project Descriptions for Government and Non Government Schools'.

Of the total allocation for non-government schools, \$1 762 674 was provided for the administrative expenses of BGAs.

BGAs determined priority for funding of schools' capital projects primarily on the basis of the relative educational disadvantage of students.

Transitional Emergency Assistance

The objective of Transitional Emergency Assistance is to provide funds for non-government schools in the event of an unexpected circumstance causing severe, temporary financial difficulty.

In 2002 the Australian Government provided an amount of \$2 353 000 under the Schools Transitional Emergency Assistance (STEA) Programme for non-government schools. Funding was provided under Section 74 of the Act. Following assessment of applications, an amount of \$1 295 000 was paid during the year and balance of available funds (\$1 058 000) are held against projects and will be spent as these progress.

GENERAL RECURRENT GRANTS PROGRAMME

The objective of the General Recurrent Grants Programme is to help government and non-government schools with the recurrent costs of school education so that they can offer students educational programmes directed towards the achievement of the Commonwealth's priorities for schooling.

Those priorities are aimed at ensuring that all students are allowed to realise their full potential, so that they leave school with the knowledge, skills and attitudes appropriate to their post-school destinations, and they have a sound foundation for undertaking further education and training, participating successfully in the workforce, and contributing to and benefiting from Australian society.

Those priorities also include support for the principles of access, choice, equity and excellence in schooling by encouraging the provision of a strong, viable and diverse selection of government and non-government schools from which parents can choose.

Under agreements between the Commonwealth and the States and between the Commonwealth and non-government school authorities, the States and authorities were required to meet educational accountability obligations by complying with the requirements set out in the Commonwealth Programmes for Schools Quadrennial Administrative Guidelines 2001 to 2004. The agreements require authorities to participate in an annual National Report on Schooling in Australia, including participating in sample studies and programme evaluations as required by the Commonwealth.

In 2002 the Australian Government provided funding of \$1 361 110 658 as block grants to government school systems on a per capita basis for allocation to schools. The per capita grants to government schools in 2002 were \$504 per primary student and \$747 per secondary student. Amounts paid depended upon actual enrolments in government schools on the schools' census day. Funds were made available under Sections 53, 108 of the Act.

On 11 May 1999 the Honourable Dr David Kemp, MP, then Minister for Education, Training and Youth Affairs, announced that, following the Review of the Education Resources Index (ERI), the ERI would be abolished as the basis for needs-based funding, and replaced with a measure of the Socio Economic Status (SES) of school communities. These new funding arrangements for non-government schools apply for this funding quadrennium. Table 1 sets out the SES funding levels for non-government per capita grants in 2002.

The SES arrangements involve the linking of student residential address data to the 1996 Australian Bureau of Statistics national Census data to obtain a measure of the capacity of the school community to support its school. The SES Data Collection of student addresses was undertaken by the Department in March-May 2000. Schools' funding levels have been determined on the basis that schools which would have been financially disadvantaged by moving to SES-based funding have had their year 2000 funding entitlements maintained in real terms for 2001 and beyond. Table 2 sets out the Year 2000 Non-Government per capita grants for 2002 for those schools which are funding maintained. Funding of \$3 363 548 531 was distributed to non-

government schools as per capita grants. Funds were made available under Sections 57, 58 and 72 of the Act.

Establishment Grants

From 2001, Establishment grants were made available in respect of newly commencing non government schools, excluding existing schools which are not in receipt of Australian Government general recurrent grants and new schools formed as a result of the amalgamation or separation of existing funded schools. Any such application for a newly commencing non-systemic school which was made after 11 May 1999 and was approved with effect from 1999 or 2000 was eligible for Establishment grants.

Establishment grants are paid at the full-time equivalent (FTE) per capita rate of \$500 for the first year of the school's operation and \$250 for the second year of operation.

In 2002 non-government schools and systems received \$2 323 752 in establishment grant funding. Funds were made available under Section 75 of the Act.

Distance Education

From 2001, General Recurrent Grants have been available for Distance Education (DE) students in eligible non-government schools. The DE students must reside in the State in which their school is located and not be home education students. A school must have State or Territory recognition for the provision of DE at a level of education and location for which the school is already being funded. In States or Territories where there is no specific registration or recognition of DE provision, State or Territory recurrent funding of these students will be accepted as evidence of recognition by the appropriate authorities.

Once approved, the school or system is able to receive general recurrent grants for its DE students at the base rate of 13.7% of the primary or secondary AGSRC amounts on an FTE basis. That is,

the school authority will receive funding having regard to the nature of the course load those students are undertaking and the time they are actually receiving DE from the school.

In 2002 an amount of \$ 471 216 was distributed to non-government schools in respect of distance education students. Funds were made available under Section 57, 58 and 72 of the Act.

TARGETED PROGRAMMES

A revised structure for targeted programmes was introduced for the 2001-2004 quadrennium. The targeted assistance programme structure for the 2001-2004 quadrennium is reflected in the *States Grants (Primary and Secondary Education Assistance) Act 2000*.

The Strategic Assistance for Improving Student Outcomes Programme, Country Areas Programme, ESL - New Arrivals Programme and Special Education Non-government Centre Support Programme were included in the funding agreements between the Commonwealth and government, catholic and independent school education authorities in each State and Territory. Grants under the National Literacy and Numeracy Strategies and Projects Programme are subject to separate contracts with funding recipients.

Strategic Assistance for Improving Students Outcomes Programme

The Strategic Assistance for Improving Student Outcomes (SAISO) Programme is the Australian Government's major programme for educationally disadvantaged students from 2001.

The SAISO Programme aims to help government and non-government school education authorities to improve the learning outcomes of educationally disadvantaged students, particularly in literacy and numeracy and the educational participation and outcomes of students with disabilities.

Funding allocations for this programme are provided to government and non-government school education authorities in the States and Territories who are responsible for the detailed administration of this programme in their systems and schools.

School education authorities have the flexibility to make decisions on which schools have the greatest need for additional assistance for educationally disadvantaged students and to determine appropriate funding amounts for those schools. Schools have the flexibility to use funding innovatively to meet the needs of their students.

Funding is to be targeted at school students from K (or equivalent) - Year 12 who are educationally disadvantaged in terms of their educational participation and learning outcomes, particularly literacy and numeracy outcomes. This may be associated with a range of factors such as disability, a language background other than English, Aboriginal and Torres Strait Islander background, low socio-economic background and learning difficulties.

In 2002 the Australian Government provided total funding of \$345 205 318 under three elements of SAISO funding. Of this \$231 180 544 was distributed for government schools and \$113 614 562 was distributed for non-government schools. An amount of \$410 212 has been offset against all

three elements of the programme and is related to 2001 overpayments for the additional assistance (compensation) and strategic assistance elements of the programme.

An amount of \$316 517 897 was provided under the recurrent element under Section 77 of the Act, of which \$219 606 000 was for government schools and \$96 911 897 was for non-government schools. An amount of \$178 1703 related to non government schools was offset against this element.

An amount of \$4 334 000 was provided under the additional assistance (compensation) element. Funding of \$3 533 209 was distributed to non government schools disadvantaged by the changes in the strategic element in 2001. An amount of \$1 377 related to non government schools was offset against this element. An amount of \$799 414 remains undistributed due to reduced numbers requiring compensation. Funds were made available under Section 77 of the Act.

Strategic assistance per capita funding was provided for the number of eligible students with disabilities. Government schools attracted strategic assistance at the rate of \$122 for each eligible student with \$11 574 544 provided under Section 78 of the Act. Non-government schools attracted funding at the rate of \$620 for each eligible student with \$13 169 456 provided under Section 79 of the Act. Amounts of \$206 712 related to government schools and \$24 020 related to non government schools were offset against this element.

National Literacy and Numeracy Strategies and Projects Programme

The prime objective is to support projects which identify, research and implement strategic national initiatives and developments in literacy and numeracy.

Specifically the element focuses on:

- identifying and promoting effective school and classroom practices to enhance literacy and numeracy learning;
- national research and strategies related to improving outcomes for:
 - Indigenous students;
 - students with disabilities;
 - students with learning difficulties; and
 - students in the middle years of schooling who have not achieved a minimum acceptable standard of literacy and numeracy skills
- effective assessment of student progress and outcomes;
- improved reporting of student progress and outcomes;
- reviewing targeting arrangements for literacy and numeracy funding;
- developing and promoting national literacy and numeracy networks;
- teacher preparation and professional development;
- home, school and community partnerships;
- early childhood education research focused on the critical areas of literacy and numeracy; and
- national coordination, dissemination and promotion.

In 2002 the Australian Government provided funding for this strand of \$8 227 000. As at 5 August 2003 an amount of \$2 513 598 has been paid for projects of which \$1 067 141 was paid to government schools and \$1 446 457 was paid to other organisations. An amount of \$ 5 713 402 has been committed and will be distributed as projects progress and meet required milestones. Funds were made available under Section 85 of the Act.

Special Education – Non-Government Centre Support Programme

The objective of Special Education – Non-Government Centre Support Programme is to provide funds to non-school organisations and community groups for the provision of educational, therapeutic and other services to children with disabilities who are below school age, students with severe disabilities, or children with disabilities in residential care. Funds can also be used to provide capital facilities and equipment for the benefit of children with disabilities.

The programme is administered by a government agent in each State and Territory on behalf of the Australian Government. In 2002 the Australian Government provided \$26 835 000 under Section 87 of the Act.

English as a Second Language (ESL) - New Arrivals Programme

This programme provides funding to government and non-government education authorities for primary and secondary school students who have recently arrived in Australia, whose first language is not English or whose language commonly spoken in the home is not English, and whose proficiency in the English language is determined, at the local level, to require intensive assistance to enable those students to participate fully in mainstream classroom activities. Eligible students, enrolled in intensive English language courses funded under this programme, are expected to receive a minimum of six months intensive English language tuition either in intensive language centres or in schools. The amount and duration of assistance to be provided for individual students is a matter for the education authorities to determine.

ESL – New Arrivals funds are allocated on the basis of actual enrolments of students who require assistance. In 2002, the Australian Government provided \$39 453 246 to assist 8 531 government school students and 847 non-government school students. Funding of \$35 889 917 was provided under this programme for government schools and \$3 563 329 for non-government schools. The per capita grant under the New Arrivals Programme for 2002 was \$4 207. Funding is provided under Sections 99 and 100 of the Act.

Country Areas Programme (CAP)

The CAP aims to improve the access of primary and secondary students in rural and geographically isolated areas to quality education which will assist them to achieve outcomes and participation rates at least equal to students in urban or less isolated areas.

Parents, administrators, teachers and members of the community are assisted through the CAP to improve the delivery of primary and secondary educational services in rural and geographically isolated areas.

CAP funding is paid directly to the government and non government education authorities in the States and the Northern Territory. Authorities have the flexibility to allocate funds according to their identified priorities based on their assessment of local need and provided they comply with CAP guidelines.

Through the CAP, the Australian Government provided \$22 182 000 in 2002 to primary and secondary school students in rural and geographically isolated areas. This amount comprised \$18 678 500 for government systems and \$3 503 500 for non-government systems and schools. The Australian Government currently uses an allocative mechanism, which is based on student numbers in small settlements and student isolation. Funding is provided under Sections 81 and 82 of the Act.

SCHOOL LANGUAGES PROGRAMME

The Schools Languages Programme included:

- the National Asian Languages and Studies in Australian Schools (NALSAS) Strategy; and
- the Languages Other than English (LOTE) Element.

The Australian Government provided a total of \$52 083 000 under the School Languages Programme for 2002.

National Asian Languages and Studies in Australian Schools (NALSAS) Strategy

The objective of the NALSAS Strategy is to assist government and non-government schools to improve participation and proficiency levels in language learning particularly in the four targeted Asian languages - Japanese, Chinese (Mandarin), Indonesian and Korean, and to introduce and maintain Asian studies content in the subjects studied by all students.

The NALSAS Strategy is a collaborative initiative of the Australian Government, and State and Territory Governments. It aims to support Asian languages and Asian studies in all school systems in order to improve Australia's capacity and preparedness to interact internationally, in particular with key Asian economies.

NALSAS funding is paid to government education authorities, Catholic Education Commissions and Associations of Independent Schools. Funds are allocated on a per capita basis within the amount specified in the Act. Funding must be applied by education authorities to enhance and expand the four targeted Asian languages and Asian studies provision for school students.

The Australian Government provided funding of \$30 432 000 for NALSAS in 2002. An amount of \$20 128 267 was distributed to the government sector and \$8 782 133 was distributed to non-government sector. The funding also included \$1 521 600 for the joint component of NALSAS, which incorporates Collaborative Projects which has been committed and will be distributed as Projects progress. Funds were made available under Sections 94, 95 and 96 of the Act.

Languages Other Than English (LOTE) Element

LOTE Element funding is paid to government education authorities, Catholic Education Commissions and Associations of Independent Schools to support the studies of languages in schools and in after hours ethnic schools. Its objective is to assist schools and communities to improve the learning of languages other than English. These can be European, Asian or Indigenous languages.

The Australian Government provided funding of \$21 651 000 for the LOTE Element in 2002. An amount of \$12 227 730 was distributed to the government sector and \$9 423 270 was distributed to the non-government sector. Funds were made available under Sections 90 and 91 of the Act.

**SUMMARY OF CAPITAL GRANTS AND PROJECT DESCRIPTIONS FOR
GOVERNMENT AND NON GOVERNMENT SCHOOLS**

Location	School	Description of Project	Grant \$
NEW SOUTH WALES			
GOVERNMENT			
Auburn	Auburn West Public School	Upgrade of new school - stage 1.	400 000
Avoca Beach	Avoca Beach Public School	Upgrade of administration area, library and learning spaces.	800 000
Banora Point West	Banora Point High School	Construction of new school - stage 1.	4 660 000
Baulkham Hills	Baulkham Hills High School	Construction of new gymnasium including stage.	1 240 000
Bega	Bega High School	Provision of new accommodation and car parking - stage 1 of upgrade.	810 000
Berala	Berala Public School	Construction of administration, library, classrooms and staff and student amenities. Provision of hall, canteen and covered outdoor learning area.	800 000
Beverly Hills	Beverly Hills Public School	Provision of new and converted accommodation such as classrooms, library, administration area and canteen to consolidate school onto one site.	150 000
Bexley	Carlton Public School	Provision of practical activities areas and withdrawal areas in classrooms. Refurbishment of library and administration.	300 000
Bidwill	Chifley College Bidwill Campus	Upgrade of junior campuses at Dunheved (general learning spaces, new covered outdoor learning area, fitness laboratory and outdoor workshop) Mount Druitt (enhanced library facilities) Bidwill (staff facilities, computer learning space and outdoor workshop)	2 202 000
Blacktown	Marayong South Public School	Consolidation of school to one site - stage 1.	100 000
Bogangar	Bogangar Public School	Construction of new school.	595 000
Cammeray	Cammeray Public School	Construction of classrooms, administration area and access link to library.	700 000
Canley Vale	Lansvale Public School	Provision of new administration facilities.	200 000
Carlingford	James Ruse Agricultural High School	Provision of materials technology spaces and facilities for total disabled access. Conversion of existing areas to general learning areas.	500 000
Carlton	Carlton South Public School	Upgrade of classrooms, core facilities, staff and student amenities.	150 000
Cecil Hills	Cecil Hills Public School	Construction of new school.	800 000
Colo Vale	Colo Vale Public School	Provision of six homebases and administration facilities.	850 000
Dorrigo	Dorrigo High School	Upgrade of staff facilities, materials workshop, music, art and general learning spaces. Provision of new administration facilities and performance workshop.	400 000
Dubbo	Dubbo Multi Campus College	Refurbishment of buildings at Dubbo South High School to senior college standard. Refurbishment of buildings at Delroy High School. Provision of shade facilities. Consolidation of Dubbo Public School to one site by providing classrooms and shade facilities. Upgrade of Dubbo South campus. Upgrade of library, general learning and specialist areas. Construction of new buildings.	1 800 000
